# CARLA A. HANSEN NURSERY

BROOKINGS, SOUTH DAKOTA

INDEXED

LIBRARY

RECEIVED

★ MAR 23 1936 ★

U. S. Department of Agriculture.

Dear Friend:

Thank you very much for your request for a copy of our Spring Price List. As we have not yet issued our Regular Spring List, we are sending you herewith what we term our Customers Advanced Spring Sale. This gives you, in brief, some of the leading specialties we have to offer and also offers them to you at lower prices than they will be offered in our Regular Spring List, a copy of which we will send you as soon as it is ready.

By ordering now you will also be assured of getting what you want, as quite a number of the items offered herewith will not be listed again in our regular list since the number of plants available is too limited. Fruit trees in particular, due to scarcity of stock and heavier demand, are a short item this spring. Your advance booking now will assure your supply.

This Special Sale Ends Mar. 30, 1936

So Order Early!

Remittance may be made by cash, money order, or check. South Dakota customers please add the 2% Sales Tax. All goods sent shipping charges collect, or if 10% is added, goods will be sent prepaid within 500 miles, or if 15% is added for over 500 miles.

## NEWEST PLANT INTRODUCTIONS

This year, due to the great shortage of fruit tree stocks we are offering some of the Newest Plant Introductions as first year whole root grafts only as this will enable our customers to obtain these new plants at a good deal less than regular prices and not wait a year for the larger trees, and will also give them a bigger start than if the same amount were spent for the larger tree. Full instructions will be sent with each order telling how to properly plant and care for the grafts for the best results.

Price: 35¢ Each; 4 Of A Kind \$1.00

GOLDO APPLE - The best winter apple for the Northwest. Giant size, excellent flavor. Long keeper. Golden color.

DOLGO CRAB - The best brilliant red jelly crab. Superb flavor. Wonderful producer. Makes a very large amount of jelly per pound of fruit. Often as high as 45 glasses of jelly and 8 pints of jam from a single peck of the fruit.

KAGA APPLE - Early winter apple with the McIntosh flavor. Very hardy. A good Northern commercial possibility.

ALEXIS CRAB - Brilliant red, jelly crab. Similar to Dolgo but usually larger size and a better annual producer.

RUSSIAN WHITE - Largest and hardiest white fleshed, large summer apple. Excellent flavor and a vigorous grower and wonderful producer.

RED FLESH CRAB - Newest Novelty Fruit introduction and forerunner of a race of red-fleshed apples and crabs. Real hardy. Fruit good sized and tasty but its most remarkable quality is that its flesh is red-dark red clear through. Be the first in your community to get one of these remarkable new fruits.

YELLOW SWEET APPLE - About the earliest of all summer apples. Excellent eating, a very heavy producer.

HOPA FLOWERING CRAB - Remarkable for its large red flowers which almost completely cover the tree in early spring. A leading ornamental.

RED SILVER CRAB - Completely red. Large red flowers, red fruit, red bark, and red foliage slightly tinged with silver underneath. A most remarkable combination. Highly praised by leading specialists.

MING PEAR - Best of Prof. Hansen's hybrid pears. Fruit of good size and flavor. Mellow flesh. Hardy.

TOM THUMB CHERRY - A most delicious red fleshed fruit. Tree very dwarf, bushy growth, scarcely knee high. A special favorite far North.

KAHINTA PLUM - Fruit up to 2 and 1-8 inches in diameter and very good eating. Red skin, yellow flesh.

SANOBI CHERRY - Choice red fleshed cherry plum, similar to Oka Cherry, but hardier and especially for the far North in Canada.

TANENA PLUM - Another sister to Waneta and Kahinta Plums and somewhat similar in great size and flavor, but because of its excellent annual bearing and well forked branches may eventually prove, - the best and most outstanding of the three sisters.

### SPECIAL FOR THE EXPERIMENTER

To those of whom would like a real collection of these new plant introductions we offer:

One Each Of The Complete 14 Above Listed Grafts Of Apples, Crabs, Pears, Plums And Cherries Only:

\$2.75 Postpaid!

### POPULAR NEW KINDS

In addition to the newest fruit introductions, we have some Anoka, Waneta, Sapa, Opata, Hanska, Kaga, & Oka Cherry to offer as grafts.

Each 25¢; 6 Of One Kind \$1.00.

### OTHER NEW PLANT SPECIALTIES

SIBERIAN BLACK CURRANT - Giant size. Excellent flavor. Makes the most delicious, rich, dark red jelly. Each 25¢; 3 For 60¢.

IMPROVED SIBERIAN CRAB - These are selections of the hardy Siberian Crab or Pyrus Baccata, But are much superior in size and quality of flavor. They make excellent jelly, pickles, etc. Extremely hardy. Fruit from about  $\frac{1}{2}$  inch up. Small trees, 25¢ Each; 6 For \$1.

THORNLESS ROSE - The newest developed hardy bush rose, that is completely thornless on stems and branches. Has large pretty pink flowers which bloom late into the summer. Each 35¢; 3 For \$1.00.

WESTERN YUCCA - Beautiful long-stalks of cream colored bell shaped flowers. Very nice for rock gardens. Each 15¢; 3 For 40¢.

### CHEE GRASS

A New Forage Grass  
That Defies Drouth!!

Introduced by Prof. N. J. Hansen of State College, from one of the driest spots of Siberia.

The leaves resemble a marsh hay tho it grows to a height of 8 to 10 feet in a season with even less than 8 inches annual rainfall even on an almost pure alkali soil. On ordinary soil it grows with equal vigor though not quite as tall and more bushy.

Chee Grass may be pastured, but will produce more forage if grown and cut for hay. It is perennial, and will last for years after once being established.

Since the seed is very light, it is best to plant by means of the roots. Plant about 6 to 12 inches apart in rows one to 3 feet apart, and they will soon make a solid field,

### PRICES

12 Plants 65¢; 50 Plants \$2.25  
100 Plants \$3.50
